İnegöl Furniture Industry's Production History of More Than 100 Years

The İnegöl Furniture Industry boasts a rich history of over 100 years in production. This long-standing heritage combines extensive experience and knowledge, enabling the creation of high-quality furniture. By blending traditional craftsmanship with modern technology, İnegöl consistently aims to provide innovative solutions. This extensive experience forms a foundation for shaping the future of the furniture industry.

5 Industrial Zones, Over 3000 Furniture Manufacturing Companies

İnegöl plays a significant role in the industry with its 5 organized industrial zones and over 3,000 furniture manufacturing companies. This extensive industrial network brings together businesses with various production capacities and capabilities. These companies, each offering solutions for different needs, make İnegöl a central hub for manufacturing. Its large-scale structure in the industry enables the production of innovative and high-quality products.

One of the Largest Production Centers in Eastern Europe

İnegöl is one of the largest furniture production centers in Eastern Europe. The advanced production facilities in the region are renowned for their high capacity and quality standards. With modern production processes and extensive manufacturing areas, İnegöl holds a leading position in the industry. This central location enhances the production strength and efficiency of the region.

Over 10 Million Square Meters of Modern Production Facilities

İnegöl stands out with its modern production facilities covering over 10 million square meters. This extensive space provides all the necessary infrastructure for high-capacity production processes. Equipped with modern technology and innovative manufacturing techniques, these facilities enable the production of high-quality and diverse furniture products. These large-scale facilities form the foundation of leadership and efficiency in the industry.

Employees**

NOT THE FAR EAST, BUT NEAR EAST İNEGÖL

01

Turkey offers a strong alternative to the Far East in furniture production. İnegöl is the meeting point of the furniture sector with its wide range of products and high-quality production. The various options provided by İnegöl offer a competitive advantage in the global market. Combining modern production facilities with traditional craftsmanship, İnegöl plays a leading role in the furniture industry.

SHORT-TERM FREIGHT ADVANTAGE

02

Thanks to İnegöl's geopolitical advantage, freight distances and costs are short and advantageous, unlike the long and costly routes from the Far East. This geographical position offers fast and economical logistics solutions. İnegöl provides its trade partners with superior logistical advantages, including lower freight costs and faster delivery times.

DELIVERY TO EUROPE IN 7 DAYS, NOT 45

03

With significant exports to the European continent, İnegöl offers great advantages in terms of delivery times and costs compared to the Far East. Deliveries to Europe take just 7 days instead of 45 days, providing fast and efficient trade opportunities. İnegöl is a preferred supplier in the European market due to its short delivery times and low costs.

MIXED CONTAINER ADVANTAGE

04

While the process of finding containers is managed separately after placing orders in the Far East, in İnegöl, this process can be managed instantly from a single location thanks to Modelf. The mixed container advantage allows different products to be shipped in a single shipment. This simplifies the supply chain and reduces costs, enabling more efficient and faster trade.
